

INME SUMMER SCHEDULE 2023

Discover Programs are designed for first time campers (9-12 year olds) and introduce them to basic adventure activities.

The 6/7-day programs focus on building confidence and making self-discoveries. The experience encourages participants to step out of their comfort zone and kick off a life-long journey of adventure and nature.

Explore Programs have a higher challenge level than the Discover Programs. They stretch the participants and aim at developing basic competence in an adventure activity.

The 7/8 day long programs go beyond the self-focus and build care for each other, the environment and for the larger community.

Challenge Programs have the highest level of adventure and thrill. Most programs are not on a fixed campus and participants set up moving camps. They plan and manage their own chores - cooking, cleaning, packing etc.

These high adventure programs aim to build courage, resilience, and achievement orientation.

OUR STORY

When Tarun, Gaurav and Ronny graduated from XLRI in 1992, they knew that they would remain friends. They shared the entrepreneurial bug. And the same values – to do work that felt like play, to have fun and to do something they believed in.

So when they started summer camps together in 1996, they set out to build an organisation that reflected these values. Together, they created a world where young people could play and learn life skills in a safe, challenging but fun environment. Together, they found beautiful sites on hilltops and by riversides. Together, they set up campuses, tents, kitchens, toilets and travel plans. They designed a curriculum full of challenge, reflection, fun and learning.

Now after 27 years of engaging over 1,00,000+ children in outdoor and adventure programs, it has enabled us to create a series of unique and memorable programs that let children discover their true potential. A thrilling mix of adventure, fun and learning – it's an experience unlike any other that you can get in regular life.

Along with Inme's open programs for 9-17 year olds, we have 3 other divisions in our organization focusing on school / educational institutions, family adventure experiences and corporate training.

Started in 1996, Youreka focuses on collaborating with schools / educational institutions to create experiential learning cycles for their students.

Fostering this desired experiential learning culture across the school is a collective effort that includes working with School Leaders, Teachers, Student Leaders & Students. Through our extensive experience we have created programs and curriculum for all stake holders in the school.
